Forecast For The United Kingdom
Issued by Met Office Exeter
at 1500 on Sunday 30 May 2021

UK Outlook for Monday 14 Jun 2021 to Monday 28 Jun 2021:
Confidence is typically low for this period, but it seems most likely that changeable conditions will characterise most of this period, with plenty of fine weather around but also spells of rain and showers, particularly but not exclusively across the north-west. Temperatures are likely to be around average, although this doesn't preclude short hot or cold spells during these two weeks.
